THE STRATEGY ON THIS SHEET

Read row 1 on the left, then row 1 on the right, then row 2 on the left. The wide jump back across the gap is the hard part — aim at the row number before you jump, not after.

- 1 Working row by row, left then right: circle every **r** and cross out every **t**.

Losing the row order matters more than a missed letter here. The sheet is about landing on the right line after a long jump.
