THE STRATEGY ON THIS SHEET

The cost of the switch is what this sheet measures. Expect the first row after the change to be your slowest, and do not let the old target pull your hand.

1 Rows 1 to 4: circle every **k**.

k k s h i r k e e n s h n n e o k o m h h e
o h t l k i o h a c e k m k a h u i n e s k
t k h m o n l s n m o o k a a s m m s k k c
a t t i s o o m n u t k e t o s r t k r k k

2 Rows 5 to 8: the target changes — circle every **v** instead. Do not go back and change anything above.

m v h i v v m u s l t s t e s v h m i n c h
v h n l m m c v a s h i c a e s v u a a v r
c l v m o s v v v r r i r n s r c r t i t h

A k circled below the switch is a perseveration error — the old rule was still running. It is the single most informative mistake on this sheet.
