SKILL TRAINED: VISUAL DISCRIMINATION · VISUAL SCANNING

THE STRATEGY: CHECK THE SMALL PRINT

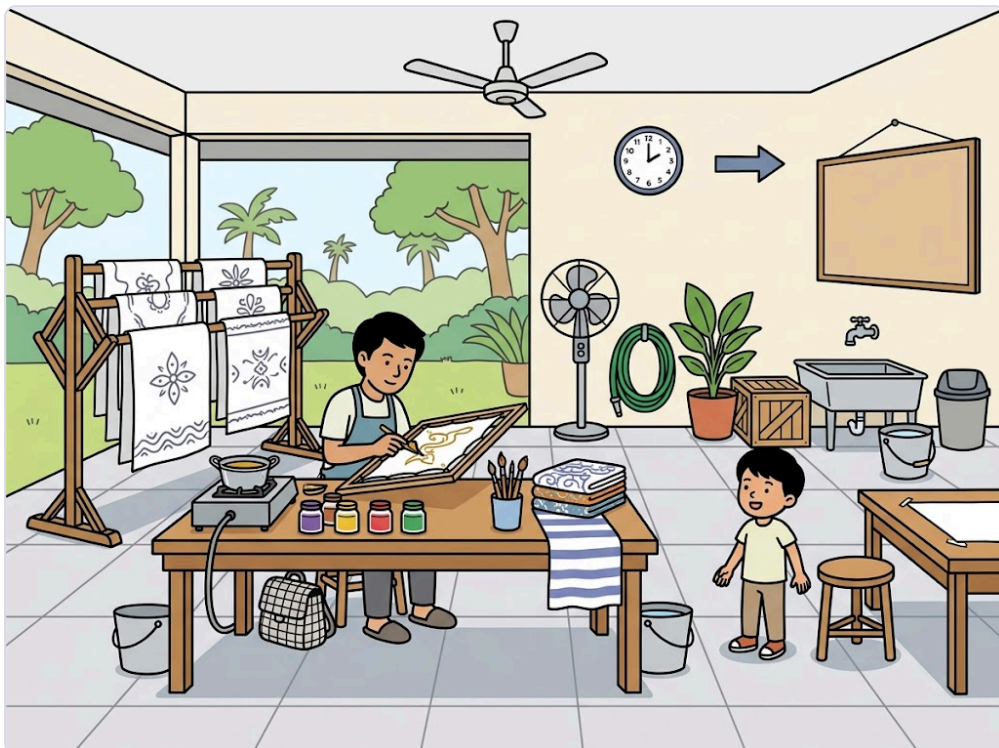

Big objects are easy. The hard changes in this workshop are small details on objects that are otherwise identical — a lid, a pattern, the number of parts something has. Once you have swept the room for whole objects, go back and look at the surface of each one: is it plain or patterned? How many pieces does it have? Count anything that comes in a set.

There are **12 differences** between Picture A and Picture B. Find them all, and tick a box each time you find one.

GRADE 6

- 1 **The ceiling fan.** The ceiling fan has lost a blade — it now has four instead of five.
- 2 **The clock.** The clock on the wall is bigger.
- 3 **The arrow.** The arrow on the wall has turned round and now points to the right instead of the left.
- 4 **The drying cloth.** The top cloth on the drying rack now has a batik pattern drawn on it.
- 5 **The wax pot.** The wax pot on the hotplate has changed from cream to grey.
- 6 **The red jar.** The lid of the red paint jar has changed from white to dark red.
- 7 **The wax pen.** The wax pen has moved from the right of the paint jars to the left of them.
- 8 **The folded cloths.** The pile of folded cloths is shorter — some of them have gone.
- 9 **The table cloth.** The cloth hanging over the table has changed from plain cream to blue and white stripes.
- 10 **The backpack.** The backpack under the table has changed from plain cream to a checked pattern.
- 11 **The bin.** The bin has changed from white to grey.
- 12 **The bucket.** The bucket beside the sink now has water in it.

BRING IT BACK TO REAL LIFE

Where else does one small detail change the whole meaning? A decimal point in the wrong place, a unit written as cm instead of mm, or a label on the wrong jar in a kitchen. Talk about one together, and write it below.
